PROFESSIONAL SUMMARY

AI/ML-focused Computer Science Engineering student with hands-on experience in Generative AI, LLMs, RAG, multi-agent systems and prompt engineering. Skilled in Python, LangGraph, LangChain, FastAPI, and model-agnostic AI development, with experience building and evaluating enterprise-focused AI solutions.

EDUCATION

Parul University

Artificial Intelligence And Machine Learning B.Tech - Computer Science & Engineering(AI/ML)

Vadodara, Gujarat

August 2024 - May 2028

Central Board Of Secondary Education(CBSE)

Science(JEE,MHT-CET) 12th Standard

Kheda,Ratnagiri-415709,Maharashtra

June 2022 - June 2024

EXPERIENCE

Generative AI Intern

Wipro PARI (Robotics And Private Limited)

May 2026 - July 2026

Pune, Maharashtra, India

- Developed a model-agnostic AI solution that integrated the byLLM tool with frameworks organized by meaning types to automate Siemens S7-1500 PLC Ladder Logic (LAD) generation from structured pseudocode, improving generation efficiency.
- Designed reusable prompt engineering frameworks for GPT, Claude, and Gemini, standardizing prompts to generate and track output quality against defined criteria.
- Implemented Python-based evaluation and benchmarking pipelines to analyze model performance and optimize prompt generation strategies.
- Architected AI workflows for industrial automation, integrating LLM orchestration and prompt optimization to automate validation.
- Authored technical documentation, evaluation reports, and implementation guidelines to support deployment and knowledge sharing.

PROJECTS

Revive AI—Revenue Recovery : Python, FastAPI, PostgreSQL, LLMs

(July 2026 - Sept 2026)

- Built an AI-driven payment recovery platform combining LLM diagnosis, ML risk scoring, and policy-controlled automation.
- Implemented robust payment verification, human-in-the-loop approval workflows, idempotent API operations, and tamper-evident audit logging to ensure secure and traceable revenue recovery actions.
- Developed automated AI orchestration with fallback mechanisms that routed revenue recovery decisions to alternative payment and LLM workflows when primary paths failed.

AIOS—Multi-Agent AI Platform : Python, LangGraph, RAG, FastAPI, Neo4j

(June 2026 - Aug 2026)

- Developed an enterprise AI platform for enterprise workflows, integrating multi-agent orchestration, Graph RAG, prompt engineering, and LLM evaluation.
- Implemented semantic + graph retrieval, model comparison, and AI workflow management for enterprise applications.
- Built full-stack services with FastAPI, React, PostgreSQL, Neo4j, Qdrant, and Docker.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript

Frameworks: FastAPI, React.js, Node.js, Flask

Developer Tools: Git, GitHub, Docker, Linux, VS Code, Postman, Azure, byLLM

Libraries: LangChain, LangGraph, TensorFlow, OpenCV, Pandas, NumPy

ACHIEVEMENTS

- 2nd Runner Up: PromptWars Vibe-Coding Hackathon, Parul University** : Developed a functional AI prototype, 2026.
- Smart India Hackathon (SIH) 2026** : Participated in the Institute-Level Internal Hackathon, Parul University.
