EDUCATION

Parul University

Vadodara, Gujarat

Artificial Intelligence And Machine Learning B.Tech - Computer Science & Engineering(AI/ML) August 2024 - May 2028

Central Board Of Secondary Education(CBSE)

Khed,Ratnagiri-415709,Maharashtra

Science(JEE,MHT-CET) 12th Standard

June 2022 - June 2024

EXPERIENCE

Generative AI Intern

May 2026 - July 2026

Wipro PARI (Robotics And Private Limited)

Pune, Maharashtra, India

- Developed a model-agnostic AI solution using byLLM and meaning-typed frameworks to automate Siemens S7-1500 PLC Ladder Logic (LAD) generation from structured pseudo code.
- Designed reusable prompt engineering frameworks enabling seamless integration across GPT, Claude, and Gemini while ensuring consistent and high-quality AI-generated outputs.
- Implemented Python-based evaluation and benchmarking pipelines to analyze model performance and optimize prompt generation strategies.
- Architected scalable AI workflows for industrial automation by integrating LLM orchestration, prompt optimization, and automated validation.
- Authored technical documentation, evaluation reports, and implementation guidelines to support deployment and knowledge sharing.

PROJECTS

Revive AI – Autonomous Revenue Recovery Platform[Python, FastAPI, PostgreSQL, LLMs](July2026 -Sept2026)

- * Built an AI-driven payment recovery platform combining LLM diagnosis, ML risk scoring, and policy-controlled automation.
- * Implemented robust payment verification, human-in-the-loop approval workflows, idempotent API operations, and tamper-evident audit logging to ensure secure and traceable revenue recovery actions.
- * Developed automated AI orchestration and fallback mechanisms to ensure reliable revenue recovery decisions across multiple payment and LLM workflows.

AIOS – Enterprise Multi-Agent AI Platform [Python, LangGraph, RAG, FastAPI, Neo4j] (June2026 -Aug2026)

- * Developed an enterprise AI platform integrating multi-agent orchestration, Graph RAG, prompt engineering, and LLM evaluation.
- * Implemented semantic + graph retrieval, model comparison, and AI workflow management for enterprise applications.
- * Built scalable full-stack services using FastAPI, React, PostgreSQL, Neo4j, Qdrant, and Docker.

Enterprise Multi-Agent Graph RAG System[Python,LangGraph,LangChain,RAG,FastAPI](May2026– June2026)

- * Developed an enterprise-grade multi-agent RAG platform using LangGraph for intelligent document retrieval and context-aware AI reasoning.
- * Implemented scalable agent orchestration, vector search, and LLM integration to automate enterprise Python, LangGraph,LangChain,RAG,FastAPI knowledge workflows.
- * Built production-ready REST APIs and containerized the application using Docker for scalable deployment.

TECHNICAL SKILLS

Languages:Python, Java, C/C++, SQL, JavaScript

Frameworks: FastAPI, React.js, Node.js, Flask

Developer Tools: Git, GitHub, Docker, Linux, VS Code, Postman, Azure, byLLM

Libraries: LangChain, LangGraph, TensorFlow, OpenCV, Pandas, NumPy
